DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, drawn to a specific type of a data label comprising a memory and a substrate, classified in class 235, subclass 492.
- II. Claims 3-5, drawn to a container comprising a memory, a housing body and a transceiver, classified in class 235, subclass 486.
- III. Claim 6-56, drawn to a label reading and processing system, classified in class 235, subclass 462.25.
- IV. Claims 57-72, drawn to the specific of a data reading system, classified in class 235, subclass 375.
- V. Claims 73-76, drawn to a method of assuring proper administration of medicine, classified in class 235, subclass 380.
- VI. Claims 77-84, drawn to the specifics of a bar code reader, classified in class 235, subclass 472.01.

Inventions I and II, III, IV, V and VI are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other

Art Unit: 2876

combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed.

The label as taught in Group I can be used in other system which does not comprising the use of the container, the label reading system, the data retrieving system, the method of administering drug, and the bar code reader as taught in Groups II, III, IV, V, and VI, respectively.

Similarly, the container as taught by Group II, can be used in a system which does not require the specific type of label as taught in Group I, the specific types of reading system, method for administering drug, and bar code reader system as recited in Groups I, III, IV, V and VI, respectively.

For similar reasons, Groups III, IV, V, and VI are restricted.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV, V, VI, and vice versa, restriction for examination purposes as indicated is proper.

Conclusion
